COCOM Document No. 3711.NI 1/4

COORDINATING COMMITTEE

RECORD OF DISCUSSION

<u>OM</u>

NEW CHEMICAL AND PETROLEUM EQUIPMENT ITEM NO. 1

16th and 18th December, 1959

Present:

Belgium (Luxembourg), France, Germany, Italy, Japan,

Notherlands, United Kingdom, United States.

References:

COCOM Documents Nos. 3700.5, 3711.00/1, 3711.NI 1/1, 2 and 3,

New Item No. 1/W.P.1 and 2.

- The BELGIAN Delegate stated that his authorities would accept the definition set out in paragraph 7 of COCOM Document 3711.NI 1/3, but, for the equipment covered at (c), they would welcome an Interpretative Note setting out the characteristics of the types which should be under embargo.
- The UNITED KINGDOM Delegate stated that he could accept the embargo for part (a) as amended and for part (c). His authorities were unable to accept part (b) however without a cut-off, which in their view, he repeated, should be the same as in the case of part (a).
- All other Delegations accepted the definition set out in paragraph 7 of COCOM Document No. 3711.NI 1/3.
- The UNITED STATES Delegate gave technical details for their authorities' inability to accept a 5-ton cut-off for part (b).
- On the 18th December the UNITED KINGDOM Delegate said that, in a spirit of compromise, he would now accept part (b) without a cut-off.

The COMMITTEE agreed that an item defined as shown below CONCLUSION: would be added to the International Lists:

"Electric vacuum furnaces as follows:

- (a) Consumable electrode vacuum arc furnaces with a capacity in excess of 5 tons, n.e.s.;
- (b) Skull type vacuum arc furnaces;
- (c) Electron beam vacuum furnaces."
